we install quality

## C o m p a n y   P r o f i l e

The C.R.C. is the datum point for those seeking excellence in the sector of production and metal ducts installation for air conditioning.

We can build channels for air conditioning in all forms and material required. Specifically, we are able to build galvanized sheet channels, sandwich panel (P.A.L.) and circular ducts (spiro).

Founded in 1995, exclusively as an industrial fitter, since 2007 also he realizes the conduct, shaping the technical drawings of the most important Italian and international design firms.

The new office is made up of about 2000 square meters of production area, 100 square meters of technical offices and 200 square meters of administrative and sales offices with about 110 working units.

Advanced machinery, high professionalism, use of the finest materials, attention to safety and the environment.

The company has experienced strong growth that has led her to collaborate with leading companies and to cooperate with leading business institutions, such as the "Compagnia delle Opere".

Today CRC Srl has become the ideal partner in the field of metal ducts installation for those seeking the highest quality.

In our workshops we are able to produce a monthly amount of about 200,000 kg of channels, building any size of channels and special pieces according to the client's requirements; we also deal with internal and external insulation, channels with certified mattresses or rock wool and also with soundproofing material, depending on customer's needs. We are currently working also with international markets and, at the beginning of this year, we started producing channels in P.A.L. too.

Check out our website - [www.crcsrl.net](http://www.crcsrl.net) - on which you can have a look at our offices and laboratories.

## Top quality in manufacturing and assembly.

C.R.C. manufactures different types of highest quality pipelines. In two manufacturing sites equipped with advanced machinery, like the latest generation plasma cutting line and the one for the production of galvanized profiles and brackets, speed and proficiency are integrated to create best quality products. The professional staff involved on the production is continuously trained with specialization courses promoted by the company in order to always guarantee a forefront service to the final client.

### **Metal ducts installation**

For over ten years, C.R.C. specializes in pipelines installation. Air vents, diffusers, fans and all other elements are placed only by specialized staff that gained long-standing experience, to ensure a perfect conditioning. Each operating step is performed following strict and advanced assembly standard, as the careful caulking process made with certified insulation.

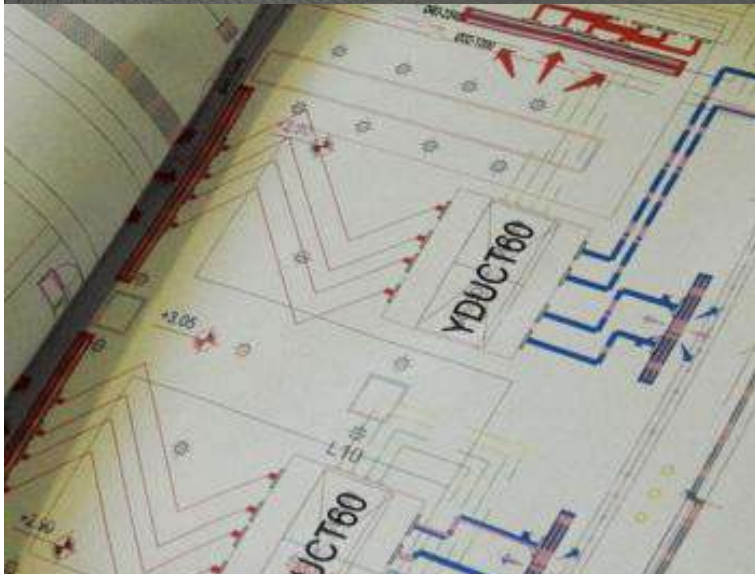

In addition to working in the highest competence, all employees CRC Srl also work in complete safety. They have available the new protective equipment and are continuously updated through courses on the prevention of risks in the company.

Only top quality for top clients.

# The company

# Workshop

# I n s u l a t i o n   s y s t e m s

Crc srl produces and installs thermal, acoustic, civil and industrial insulations. Our production can meet all the following insulation needs:

- air conditioning, heating, hot/cold generating plants;
- chemical plants and refineries;
- hospital - civil - pharmaceutical - industry - service sector
- Sound insulation of noisy environments.

Each project is studied in detail for choosing suitable materials, respecting the specific system needs, the operating conditions and the long term environmental impact.

All the manufactured products for the exterior finish are designed and produced in our workshops by professional staff using constantly updated equipment for machining of aluminum, stainless steel, galvanized and pre-painted steel.

# C h a n n e l s   f o r   a e r a u l i c   s y s t e m s

Crc srl manufactures and installs channels for aeraulic systems, directly produced in our factories equipped with the latest machinery and, thanks to the highly skilled staff involved, we can produce any kind of channels and special pieces.

The experience gained in the insulation, due also to the difficult insulation of pre-assembled channels, led us to specialize in insulation directly in our factory. Installing a straight connected system to the production allows us to deliver a high quality product, optimizing costs.
